In Cab Accessories

Best accessories to increase productivity

When you are on the road for days, or even weeks, at a time, it is important to be comfortable and satisfied. There are many in-cab accessories that drivers can add to improve comfort, entertainment, and meals.

Comfort

When you spend more days on the road than at home, it is important to have a comfortable bed. Old beds can cause sore backs and sleepless nights. Upgrading your bed every few years is a necessity, as beds wear out over time. Foam toppers for your mattress are also a great way to improve comfort. For the colder months, Bunk warmers are great for keeping you warm.

Long drives put serious wear on your seat, causing sore muscles and joints. Upgrading your seat can improve your health, reducing the need for pain medications and doctor visits. There are many different materials and styles of seats, giving you many options to find a seat most comfortable for your needs. Even if you have already upgraded your seat before, it may be time to get a new one. Heated seats are an additional upgrade to maximize comfort.

Entertainment

With devices such as laptops and most tablets, Internet is inaccessible without Wi-Fi. Although truck stops typically have Wi-Fi, it is usually slow and unreliable. A mobile wireless Internet hot spot can be used for speedy Internet on the go. Although mobile hot spots do cost money each month for their use, they are a great addition for drivers who love to surf the web. No contract mobile hot spots can be purchased at any large electronic stores.

Video game systems are a great way to keep you entertained and connect with family or friends during downtime. Using the hot spot mentioned above, drivers can purchase on-line subscriptions to play games with their friends and family. However, be sure to keep an eye on the clock, as you do not want to play too long and miss out on some rest.

Food and Drinks

Candy bars and fast food are not very healthy, or appetizing, over long periods of time. Homemade meals taste better and are healthier for you, but on the road cooking is limited. Slow cookers (Crockpot) are a must have for any truck driver. Delicious meals such as chili, lasagna, or pulled pork can be cooked on the road with a slow cooker, and taste as good as it would at home.

Aside from keeping drinks cold, a Mini fridge is a great addition to a truck for keeping food cold. A mini fridge is a necessity for using a slow cooker to store ingredients, whether raw or as leftovers. The ability to store leftovers and healthier foods will generate cost savings, as well as keeping the pounds off.
